MIFTAHUL MUHAEMEN

Fullstack Developer (Go & React.js)

Kota Banjarmasin, Indonesia • +62 896-7717-6035 • miftahulmuhaemen@gmail.com • linkedin.com/in/miftahulmuhaemen • github.com/miftahulmuhaemen • muhaemen.my.id

PROFESSIONAL SUMMARY

Fullstack Developer with 5+ years of software engineering experience delivering responsive web applications, modern React.js/TypeScript interfaces, and high-throughput Golang backend systems. Creator of production fullstack systems including the offline-first Point of Sale & Inventory System for Koperasi KHMB. Proven track record architecting event-driven RESTful APIs, distributed microservices, and end-to-end cloud deployments across Kubernetes and Docker.

TECHNICAL SKILLS

Languages: Golang (Go), TypeScript, JavaScript (ES6+), Python, SQL, HTML5, CSS3.

Frontend Engineering: React.js, Vite, Tailwind CSS, Next.js, IndexedDB (Dexie.js), WebSerial/WebUSB, Svelte, Responsive UI/UX.

Backend & Microservices: Go (Echo v4, Gin, Chi), RESTful APIs, gRPC, JWT Authentication, Microservices, Node.js (NestJS).

Databases & Storage: PostgreSQL 14+ (CTEs, B-tree pattern ops), Redis, MongoDB, Cloudflare D1/R2, Schema Design.

Cloud, DevOps & QA: Docker, Dokploy, Kubernetes (GCP GKE), GitHub Actions, Vitest, Playwright, k6 load testing, Sentry.

FEATURED FULLSTACK PRODUCTION PROJECTS

Point of Sale & Inventory System — Koperasi KHMB *10/2026 | Fullstack POS Platform | muhaemen.my.id/025_koperasi_khmb/*

- Architected an offline-first Point of Sale & inventory system pairing a high-throughput Go 1.22 REST backend (Echo v4) with a responsive React/TypeScript frontend (Vite, Dexie.js IndexedDB, Tailwind CSS).
- Implemented resilient background delta synchronization with idempotency keys, preventing double-charging or duplicated inventory deductions during network dropouts.
- Optimized PostgreSQL queries using Common Table Expressions (CTEs) for pre-aggregated daily summaries, cutting report latency by over 70%.
- Engineered hardware USB/Bluetooth barcode scanner HID heuristics and direct ESC/POS thermal printing via WebSerial and WebUSB.

Sanak Keluarga & Sipamanobat — Interactive Web Applications *2025 | muhaemen.my.id*

- Built interactive client-side visualizers and searchable formulary systems using React, TypeScript, Vite, Tailwind CSS, and Monaco Editor.
- Integrated automated data extraction pipelines using Python and Selenium for continuous catalog indexing.

PROFESSIONAL EXPERIENCE

Fullstack & Backend Engineer — Blue Sky Tech (Bythen AI) *03/2025 – 06/2026 | Remote*

- Architected fullstack generative AI management consoles using React frontend and high-performance Go backend microservices, reducing dashboard load times by 40%.
- Engineered asynchronous task processing pipelines with GCP Pub/Sub and webhook workers, reliably decoupling long-running GPU rendering workloads from client-facing REST APIs.
- Constructed automated analytical data workflows with Python and Metabase, aggregating over 10M+ operational event records.

Software Engineer (Fullstack & Backend) — Feedloop AI *12/2022 – 02/2025 | Jakarta, Indonesia*

- Engineered scalable AI web application platforms, NestJS microservices, and interactive frontend interfaces backed by Kubernetes clusters on GCP.
- Administered production containerized microservices and automated CI/CD deployment pipelines using Docker and GitHub Actions.

Software Engineer — PT Arkan Jaya Nusantara *01/2021 – 11/2022 | Indonesia*

- Built fullstack IoT monitoring platforms using Go backend services and React frontends with Web Bluetooth device communication.
- Designed RESTful APIs and MongoDB data stores with automated Docker test suites.

EDUCATION

Bachelor of Computer Science (S.Kom) — Universitas Lambung Mangkurat *08/2015 – 03/2020 | GPA: 3.48 / 4.00*
